Christopher Thies
Tunista Construction, LLC
33400 8th Ave. South, Suite 105
Federal Way, WA 98003

Dear Chris:

Thanks for signing on to Salmon-Safe accreditation! This letter is to confirm that Tunista Construction's Puget Sound operations have met the requirements for Salmon-Safe accreditation for large-scale construction management based upon meeting the single "condition" outlined below.

In the judgment of Salmon-Safe and our independent expert evaluator for construction management, Tad Deshler, Tunista is awarded accreditation through April 2026 subject to the following condition, as well as annual verification reporting throughout the three-year accreditation cycle. Annual reporting will be due beginning in December 2023.¹

SWPPP review and site visit to the Lake Ballinger aquatic ecosystem restoration project once construction gets started, likely in May 2023.

Salmon-Safe's decision is based on exemplary pollution prevention practices at the SEA Delta Concourse, Rainier Beach High School, and Pierce College STEM Building sites inspected on March 24, 2023. To formalize accreditation, we'd appreciate it if you could sign this letter in the space provided below, indicating that you commit to the condition noted above, and email it back to anna@salmonsafe.org.

We're enthusiastic about working with Tunista to promote your environmental leadership in the region and beyond. Thanks to you and everyone at Tunista for their commitment to environmental protection.

Kind regards,

Anna Huttel, RA
Certification Director

Tunista Construction, LLC agrees to meet the condition as outlined above to maintain Salmon-Safe accreditation through April 2026.
